Least Reached People Group	Evangelism, education, and community development are the three priority projects of the least reached people group we serve in Cameroon and Nigeria. Our three priorities are interconnected, with no single project progressing without the other two also moving ahead. For Christians in their faith communities, bringing the Good News of Jesus to others is the ultimate goal. Education and community development (including humanitarian aid) are entered into strategically so that the Gospel will be seen, experienced, and promoted. All together, these projects are leading to lives being transformed by Jesus Christ to the glory of God.	Ongoing
Mbingo Cancer Radiation Therapy	Access to radiation therapy is extremely limited in sub-Saharan Africa, and the majority of patients presenting with tumors can benefit from treatment with radiation. As part of the plan to develop a comprehensive cancer center, Mbingo Baptist Hospital is working to install a radiation therapy unit consisting of a large bunker containing two linear accelerators. The design of the bunker has been officially approved by the national radiation safety board of Cameroon, and a used linear accelerator has already been donated. In addition to the NAB, the CBC Health Services and the Dana Farber Cancer Institute at Harvard will be supporting the funding of the bunker.	\$600,000
